## DETAILED ACTION

### *Response to Amendment*

1. Applicant's amendment was received on 8/27/04, and has been entered and made of record. Currently, **claims 30-35** are pending.

### *Response to Arguments*

2. Applicant's arguments, see pages 6-9, filed 8/27/04, with respect to rejection of claim 30 have been fully considered and are persuasive. The rejection of claim 30 has been withdrawn.

### *Allowable Subject Matter*

3. **Claims 30-35** are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record do not teach or suggest the limitation of the claimed image input device in an apparatus wherein the input device includes picture elements, each of which picture elements reads a part of each image to be converted,

an area of the part of each image to be read by each picture element is changeable in accordance with at least one of a dimension of the composite image to be printed and a dimension of each image to be read, so that the images are included in the composite image.

As noted by the applicant, see page 8, filed 8/27/04, the applicant's invention is different from the teaching of the Canon device since each picture element is

Art Unit: 2622

changeable prior to the image reading process in accordance with at least one of a dimension of the composite image to be printed and a dimension of each image to be read, so that the images are included in the composite image.

5. Some of the prior art related to the apparatus are cited and detailed below which fail to teach the limitation of independent claim 30 as stated above.

The most relevant prior art Miyauchi et al. U.S. Patent No. 6,424,433 (hereinafter Miyauchi) discloses an apparatus comprising:

an image input device for reading each of the image to be converted to the data of the image wherein:

the image input device includes picture elements, each of which picture elements reads a part of each image to be converted,

an area of the part of each image to be read by each picture element is changeable (changing the resolution) in accordance with a resolution of each image specified.

However, Miyauchi does not teach or suggest the limitations for changing each picture element in accordance with at least one of a dimension of the composite image to be printed and a dimension of each image to be read, so that the images are included in the composite image.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
